ties of *Glocester* and *Suffolk*.

**DANIEL WOODWARD,**

(Out of the Honour and Respect he bears their  
Worthy Persons ) most humbly dedicates  
to their Patronage these his Astronomical,  
Astrological and Meteorological Endeavours  
and Predictions ( that they may be shelter'd  
under the *Umbra* of their Protection ) for  
the Year of Man's Redemption 1693, wish-  
ing them not only long and salubrious Lives  
on this Terrestrial Orb, but also prosperous  
and happy to their final Termination.

*Contra Hominem justum pravè contendere noli  
Semper enim Deus injustas ulciscitur Iras.*

Courteous Reader ;

**T**HE many great Transactions and surprizing Mutations and Revolutions that have happened in Europe since that memorable and thrice noted Conjunction of the two Superiors,  $\text{H}$  and  $\text{V}$  in  $\text{A}$ , 1682 and 1683, and that amazing Comet in 1680, are most manifest and convincing Testimonies, that those glorious Lamps of Heaven, and such extraordinary Phænomena, were never design'd by him who is the Fountain of Wisdom, for meer unprofitable Speculations, or only for Mortals confusedly gaze at ; but for Ends more noble and agreeable to his great Wisdom and Providence, and more useful and beneficial to Mankind, to wit, Celestial Study and Contemplation ; whence Men might make a Library of the Firmament, and read the Will of the All-wise and Eternal Creator in that great Volume of Astrology, the glorious Frontispiece of Heaven ! Quid pulchrius excogitari potest, quàm præclara Mundi machina, mirabile Dei opus ? quid decentius ordine illo corporum Cœlestium, quem Deus illis imperavit, & in æternum servandum dedit ?

Whether have some of our late Endeavours of this kind been very wide of this great Purpose. For how often, from the Monitors of Heaven, has the World been Astrologically advertised not only of the Prosperity which the Kingdoms of England, Scotland and Ireland now enjoy, under the happy and glorious Reign of their present Majesties ; but also of the approaching catastrophe of the Power of France ! Are not the past Events ( so often testified by the Signs of Heaven, where Effects are seen in the Fountain of Causes ) clear Demonstrations that the Almighty is engaged in the contest, and that he hath decreed to frustrate the ambitious, barbarous and tyrannical Designs of that Tyrannical Prince, the French King ? How infinitely to be admired are his great Mercies to us the People of England, both in his late miraculous delivering us from Idolatry and Slavery, and his preserving Peace amongst us, whilst the Sword has made a woful Devastation almost all over Europe, and ranged even round about us ! witnesslanders on our East, Scotland on our North, Ireland on our West, and the late French Fleet on our South, &c. These as they are great and publick Blessings, so do they more than merit our great and publick Returns of Thanks, in the first place to that high Hand of Providence from whence they equally proceed ; and in the next, to those great and only Instruments of the same, their sacred Majesties K. William and Q. Mary, whom God long preserve as a farther Blessing, and a true nursing Father and Mother to these Nations : which is the earnest Prayer of,

their Majesties most obedient Subject, and Country's Annual Remembrancer,

D Julii 20, 1692.

WOODWARD.

# Observations.

Δόξα καὶ Ἐπαινοῦ τοῦ Θεοῦ.

The *New-Year* seems to enter attended with the turbulent Effects of some late violent ♂'s and ♀'s of the *Malifick* and *superiour* Planets, and ♂ alone is here in his *Essential* Dignities! whence the Minds of Men are violently inclin'd, and bent for dangerous and daring Enterprizes.

The Figure of the *Sun's* late *Brumal Ingress* indicates a plotting *Winter-Quarter*, especially amongst the irreligious Orders of *Monks*, *Jesuites*, &c.

Also that to the time of greatest Obscuration in the *Moon's Eclipse*, is such, from whence we may shortly expect to hear of many deep Consultations among the *Papal Faction*, in order to the Cure of some desperate Distempers reigning in the *Roman See*; the cause whereof perhaps proceeded from their own former too, too fine-spun *Politicks*, wherein they have much out-witted and begull'd themselves, and now it's time for them to apply the *Ex-tream Unction*. *Suis & ipsa Roma viribus ruit.*

# February hath XXVIII Days.

Tytan's late Trine to Jove in Gemini,  
To the Twin-City, Honours doth descry:  
And glorious Hesper, Hermes, Mars too,  
The same Aspekt to the same Jove do's shew:  
Brisk Trade, and glad some Tydings hence accrews  
Unto her Merchants. God send more such News.

## Observations.

*Nunquam sera est, ad bonos mores via.*

The beginning of this Month will also much participate of the plotting Effects both of the Brumal Ingress and the Moon's Eclipse mentioned in the last, but will be soon succeeded with the happy Influences of ☉'s healing △ to ♈, and his \* to ♈, with some others of like Signification in this Month, whence not only many clandestine Contrivances become frustrate, and things design'd for evil, fall out for the good of Europe, but even some eminent Promoters of Discontent, themselves (seeing their own Folly in kicking against the Pricks, and the Hand of God manifestly against them) become more wise and peaceably inclin'd, and prudently prefer Obedience before Sacrifice.

Great Endeavours about this time for Peace between the Turkish and German Empires, and those (in all probability) likely to prove effectual; whence must necessarily follow the Humiliation of our neighbouring Grand Signiour, or Christian Turk. Faxit Deus.

Note, the Roman Account is always 10 days before the English; so that their 11th day is our First day.

# March hath XXXI Days.

What means these Frowns! old *Chronus*, why dost thou  
Thus sternly bend thy discontented Brow  
Against the *SUN*, who doth on thee dispence  
Such gentle, warm and God-like Influence?

If thou must act this *Tragick Part*, then know  
Its *Epilogue* is thine own Overthrow.

## Observations.

This Month ( wherein the Brumal Quarter makes its *Exit*, and thereby yields Succession to the approaching *Spring* ) will ( it's hop'd ) be lenify'd *ex parte*, with the gentle Influences of the last ; yet being ushered in with the poisonous *Square* of *Sol* and *Saturn*, and other *Male-Concomitants* attending, 'tis to be doubted.

The *Sun* has now pass through the Vernal *Equinox*, at the precise moment whereof the Heavens were in a very angry and violent Position, thence influencing Men and Nations with suitable Designs. And now the great business of *Princes* and *States* is in preparing to put in Execution their respective late contrived Projects, which chiefly tend to *Slaughter* and *Blood-shed*.

April hath XXX Days.

In this blest Month was born the most serene  
Lady, Great Nassaw's and Great Britain's Queen:  
Whose Vertues, Beauty, Parts and Royal Story  
Benights all Lustre of preceeding Glory:

A QUEEN (that briefly to characterize her)  
Wants nothing but a *People* that could prize her.

## Observations.

\* *Agens* *ἐν* *ῥήμῳ* *ἔστ.*

The Proceedings in this Month's Affairs seem to out-strip the Season; and the Spirits and Resolutions of our great *Ones* (such whose Valour and Fortune leads them to be chiefly concern'd in, and for the *Glory* and *Safety* of their *King* and *Country*) seem to be very impatient for Opportunities befitting *Action*. Our Grumblers, and those that would oppose the noble *Genius* of the Nation, decline daily, both in Number and Interest, and (to their eternal Reproach) their Clandestine Designs daily break out against them ere they are well hatch'd: Yet the viperous *Tongues* and *Pens* of the malicious will be moving; and *false News* and *Libels* against the Government are still secretly promoted, by such as are industrious for their own Ruin. *Quos perdere vult Jupiter dementes facit.*

The ☐ of ♀ and ♂, and ☿ of ♀ and ♀ in this Month, cut out Crimson-work for the next two or three Months following.

# May hath XXXI Days.

Mars mounts the Ram (his Purple Flag appears)  
 And Attributes of Blood and Slaughter wears.  
 'Tis He is Umpire, in a hot Contest,  
 And gives the Day to those deserve it best;  
 Whilst Jove and Chronus friendly Beams bestow  
 To Laureate an English Hero's Brow.

# Observations.

Some famous Action is near at hand approaching, which will add to the Honour of the *English* Nation, and be fatal to some of its implacable Enemies; for ♂ in ♍ (*England's* general Ascendent) applying to a Δ of ♈ and \* of ♎ is of noble signification both to *England* and its victorious Monarch; who, wheresoever he goes, is still courted and followed by most of the Princes of *Europe* (at least) by their Agents, and carries with him the *Orbs* of all their Motions; as the superior Planets do those of their *Satellites*, or *Planets* those of all the Wanderers.

The ♂ of ☉ and ♈ which happen'd this time twelve month, was attended with the discovery of the horrid *Conspiracy* to let in the *French* upon us, together with the glad and chearing Intelligence of the famous Victory obtained over the *French Fleet* (which were significantly hinted at, in our last Year's *May's* Observations). And why may not this ♂ of ☉ and ♈ now be attended with like Effects?

# June hath XXX Days.

In this serene and flow'ry Month of *June*,  
 Bright *Sol's* eclipsed by the pale-fac'd *Moon*!  
 Yet the *Defect's* but small; and thence propounds  
 Means for Amendment, rather than confounds;  
 Bids *Male-Co:texts* renounce their rav'nous Natures,  
 Signe *Palinodiums* and become new Creatures.

## Observations.

*Temporis filia veritas.*

Daily Intelligence arrives of the drawing together of numerous Bodies in the Field, their swift Marches, and unanimous and vigorous Proceedings against the common Enemy of Europe, whose Glory is now a sinking in the Eyes of all the World.

Frequent skirmishing of Party-forces, and some very eminent and considerable Towns, or Places of Strengtn, forced by a powerful Siege, to a Surrender near this time. *Nulla est tanta vis, quæ non debilitari ac frangi possit.*

The frowning and poisonous Beams of h's ♂ is darted against a Female of no mean Faræ and Quality amongst us, which may (at least) prove fatal to her Honour and publick Estimation, if not dangerous to her Life.

The harmonious Synod of Planets in ☿ (viz. of ☉ ♀ and ♀) is of excellent signification to Hol- and; & also shews the strengthening of the Alliance and Confederacy among the European Princes.

# July hath XXXI Days.

The *Crisis* of the Year seems now at hand,  
The *fatal Sisters* bearing chief Command!  
Armies draw near, each other to engage;  
Their several Parts t'act on a bloody Stage.

*Mountains* and *Dales* landskip the *Tragick Scent*,  
And braver Hearts and Feats have seldom been.

# Observations.

*Magna bellorum mina.*

As the Actions and Accidents of this Year (I mean as to *Europe* in general) seem to exceed in Greatness those of many other Years; so the *Actions*, &c. of this Month are (in my Judgment) pointed out to be the most considerable and transcendent, the most desperate, bloody and fatal of the whole Year! Battels and Towns (*plurali numero*) seem to be won and lost about this time, with great Effusion of Blood, whereby the War should be carried into the very Bowels of *France*; and in the Glory of these great Actions, the English should be no small Sharers; for *Mars* (their Patron among the Planets) is favoured with the *Sextiles* of *Mercury*, *Venus* and the *Sun*. But were it not for the *Sun's* friendly and saluiferous Beams to *Mars* and *Saturn* (who are in Opposition) I should greatly fear the breaking out of some Pestilential Distemper in and about *London*.

Observations.

Many and various Rumours and Reports (relating to some great Actions lately past, and the Horror and Confusion reigning in several parts, amongst the Enemies of England in particular, and of all Europe in general) but those mostly wide of the Truth, as well as differing among themselves, are likely to attend the *Quartile Aspects* of *Saturn & Mars* to *Mercury*. But the *Sextile* of *Jove* to this *Celestial Messenger*, will soon inform us better. O fortunate, but ungrateful *England!* what cause hast thou to render Thanks to HEAVEN, and thy gracious Lord the KING, for thy Domestick Peace, whilst thy Enemies are mourning in *Blood, Dust and Ashes?* Canst thou forget thy many and great Deliverances from the Ravages of *Tyranny* and *Idolatry*, and the numerous *Plots* and *Contrivances* to turn thy fertile Fields into *Acaldema's*? Consider these things and be not wise too late.

## Observations.

*Quod aliis cibis aliis venenum est.*

This Month begins with a friendly Sextile of the Sun and Jupiter, and ends with the same of the Sun and Saturn; but the five Squares of the last Month (corroborated with two more in this) will intercept and obstruct their healing Influences.

The Felicity of some People proceeds often from the Misery of others, & contra; and this Truth was never more universally apparent than at this time, when the most miserable and melancholly Circumstances of one Nation is accounted the best News that could ever happen to another.

The glorious ☿ has now made his recess to the Autumnal Equinox; the Figure whereof may be likely both to hasten and aggravate the Effects of the late thrice repeated Opposition of Saturn and Jupiter. God preserve England's Metropolis from all Contagious and Epidemical Diseases (which may be feared will be the Consequences of this ♂ in many parts) this Autumnal Quarter.

October hath XXXI Days.

And now behold cold *Autumn-Blasts* bereaves  
The *shady Arbors* of their *verdant Leaves*.  
*Titan's* in *Square* to *Jove* and *Mars* conjoyn'd,  
Whence *Mortals* here *unsought-for Sorrows* find.  
Some *Poets* call *Autumnus* *Morbifer*;  
God grant it proves not too much so *this Year*.

### Observations.

*Impendet scutica.*

The Influences of the late Oppositions of the *Superiors*, will now or near this time manifest themselves to purpose! The *Mutual Aspects* of this Month (as well as some of the two last) do as it were conspire to promote and put them forward. Such *Oppositions* seldom happen, but some strange *Epidemical* Distempers quickly follow, as well as other dire Calamities and Judgments on sundry Places and People. *Dixis advertat!*

Men of the most malicious and corrupt Minds are now most active on the World's Theater.—Honesty and Ingenuity suffers, nay, the *Long Robe* is not free from Eclipses and most malicious Aspersions about this time, but this will be but short-liv'd. *Post Tenebras spero lucem.* After a Storm comes a Calm.

God direct the Magistrates and honourable Courts of Judicature in their Administrations, and defend them from Delusions of false Informations and Depositions, &c.

November hath XXX Days.

*WILLIAM the Great, that Darling of Renown,  
(Of England's Scotland's France and Ireland's Crown,  
The rightful Guardian) in this Month was born,  
The Annals of these Kingdoms to adorn  
With his great Victories, which Heav'n increase,  
And crown his Reign with everlasting Peace.*

To close the Year, a Halter doth reward,  
 The plotting Pains of some, have labour'd hard  
 In building mighty Castles in the Skies,  
 And promising themselves our Lives as Prize:  
 But farewell them! Let us God's Word obey,

Observations.

*Jam fere finitur Annus.*

The Year hastens to an End. I wish the Troubles (and Troublers too) of Europe might make their *exeat omnes* together with it. Perhaps some few of the latter (and those no mean ones) may; and that by the hand of incensed Justice! But yet (*alas!*) 'tis nothing to a thorow Purgation.

The ☿ of ☉ and ♀ bends the brows of Authority. Good God! will nothing reconcile a grumbling discontented Tribe? no warning suffice, no gracious Indulgence invite them from their own (in an obstinate and wicked pursuit of others) Destruction? will not all their past defeated Plots and Conspiracies convince them of their Madness in contriving new ones? What shall I say? Let them receive that Reward which Fate (the Minister of Divine (as well as Human) Justice) has appointed them. And may the bounteous Heavens (as heretofore) still guard their sacred Majesties K. William and Q. Mary from all Domestick and External Dangers, henceforth and for ever. Amen.

# Of the ECLIPSES this present Year, 1693.

FOUR times this Year will the *Luminaries* of Heaven be Eclipsed from the Inhabitants of this *Earthly Globe*, viz. Twice the *Sun*, (or rather the *Earth*, in regard it's not the *Sun* but the *Earth* which is depriv'd of Light) and Twice the *Moon*; but (in our Hemisphere;) only one defect of the *Sun*, and one of the *Moon*, will be Visible.

1. The *First*, in order, will be of the *Moon*, a great and total Eclipse, on *January* the 12<sup>th</sup>. it happens in the 3<sup>d</sup>. deg. of the Celestial Sign  $\Omega$ , and may be observed by us, if the *Air* be Clear. (As thus appears from the *Caroline Tables*, the very best in Print.)

	End of total darkness at	3	51	50	
	Full recovery, or end of the <i>Eclip.</i> at	5	42	32	
<i>Digits Eclipsed</i> 18 33.					

2. The *Second* will be of the *Sun*, on *June* the 23<sup>d</sup>. but it will be so very small an Eclipse, that it will not be material for common Observation. But those that are curious, and furnished with fit Instruments, may observe,

(Ex Tab. <i>ijdem.</i> )				

3. The *Third* will be a large Eclipse of the *Moon*, on the 7<sup>th</sup>. of *July*, about our half an hour after Ten, in the Morning, Invisible to us, but Visible and Total to those that shall then happen to Navigate in the remote *W. Bern Seas*, called *Mar-del-zu*; and to most of the *Western* and *North-West* parts of *America*.

4. The *Fourth*, and last, will be a pretty large defect of the *Sun*, on *December* the 16<sup>th</sup>. about our Midnight; E<sup>g</sup> to us not Visible, but may be seen at Noon-day with our *Antipodes*, about *Staten-land*, *New-Zealand*, and the adjacent *Islands*.

# 693. Astrological OBSERVATIONS on the Year, 1693.

By DANIEL WOODWARD.

Deduced from the Consideration of the Triple Conjunction of Saturn and Jupiter, 1682 and 1683, (whose Influence and Effects Europe is still under,) together with the Eclipses of the Luminaries aforegoing, and the Sun's Ingress into the Equinoctial Sign Aries. The Calculation of which Ingress from the Caroline Tables, is as followeth.

Thus the Equal Time at London, in which the Glorious Sun salutes the first Punctum of the Celestial Sign Aries, Anno 1693, is March the 9th. at almost 52 min. after 8 at Night; and hence the Time Apparent (the Equation, for the inequality of Natural Days being 7 min. add.) is 59 min. after 8 at Night, at which time the face of Heaven presents its self according to the following SCHEME in our English Horizon.

Where, he whose Genius is Sublimely giv'n,  
May Lodge a while i th' Mansions of bright Heaven;  
Where he may view each Planet in his Seat,  
(By GODS decree) appointing Europe's Fate;  
And read (with indefatigable Eyes,)  
Th' obscure (yet rare) Enigma's of the Skies.

# OBSERVATIONS, 1693.

The Position of Heaven at the Suns Ingress.

**T**He stupendious Effects of that memorable triple Conjunction of the two Superiors (which happened first in *Octob.* 1682. 20 deg. of the Regal Sign *Leo*, and by reason of their Retrogradations, was again reiterated in *Jan.* and *May* so lowing, in 17 and 14 degrees of the same Sign) are now certainly near their Vertex, or utmost height of Power and Operation! (the force and vertue of such Conjunction: always continuing in duration 20 years, the Radix of their Celebration, and increasing in Efficacy till their Opposition, (at, or about which time, they do most vehemently of all Exert their Influence and Activity,) and then again decreasing :) Seeing the Opposition of these Superiors have been now lately twice repaired, (*viz.* about the 12th. of *June* and 3d. of *December* last,) and will also be made

## OBSERVATIONS, 1693.

Triple Opposition, by another reiteration on the 22th. of April next ensuing; and celebrated in the 6th, 14th, and 21th degrees of the Signs *Gemini* and *Sagitary*. Hence we may, with great reason, expect this present Year to be (*revera*) *Annus Mirabilis*; a Year (in very truth) full of wonderful and surprising Accidents, and those too of such Magnitude and Importance, as tend to nothing less than a *Catastrophe* or Subversion of those Parts or Countries, Religions, Monarchies and Powers, where they are ordain'd to fall: For if the Primary Effects of this Conjunction have been followed with so great an Effusion of Blood betwixt the *Germans* and *Turks*, (who hitherto have chiefly shar'd its Influence,) and caus'd such fatal Convulsions in the *Turkish Empire*! What strange Mutations then, nay what great Revolutions rather, may we not now this present Year expect, to attend the very midst & highest of its force & operation?

Moreover it may be observed, That the *second* and *third* Meeting of these Superiors in the Triple Conjunction, was (by reason of their Retrogradations, as before noted) a little more Westward in the Ecliptick than their *first* Meeting: And the same order hath been most manifest in their Effects here below; for as their direful Operations began of late, and still continue to lessen and draw to a period in the Eastward, (*viz.* amongst the *Germans* and *Turks*, where, as I said before, they first Commenced) so (in like manner) have they spread themselves more forcibly towards the Westward, and are now become most vigorous on this side the Mountains. But, blessed be God, there are great Hopes that the violence of the Storm is past and over (tho' still some sprinklings may remain) in these Kingdoms of *England*, *Scotland* and *Ireland*, (the latter of which the Native Rebels & *French* Invaders, have had it with a Witness.) But this *Obiter*; Now to the consideration of the preceeding *Vernal* Scheme. wherein,

First, We may observe, That the Cardinals Angler of the Figure are possessed by fixt and violent Signs. Secondly, That the Warlike Planet *Mars* is Lord of the Ascendant. Thirdly, That he is conjoyn'd with the Lady of the Eighth, in the fourth House, and both in Opposition to the Moon! Fourthly, That the places of the forementioned Triple Conjunction of the Superiors, together with that Regal Star the *Lyons Heart*, are placed in the Heart of Heaven, &c.

From these and other concurring Positions and Testimonies, it is Astrologically Manifest, That the Chiefest designs and

## OBSERVATIONS, 1693.

performances of the generality of Mankind, will be Cardinal, Violent, Resolute and Martial, in the extreamest measure during this following Spring and Summer Quarters, heightning and aggravating those great Effects of the before-mentioned Conjunction which will stir up the Kings and Princes of the Earth to Military Exploits in order to the speedy bringing to a Conclusion their former conceived Projects and Resolutions, and generally to the hastening on the Fate of Europe in this grand Hurly-burly of Affairs wherein it's now Engaged.

It will be needless here to look so high as the Stars, to enquire from thence what Countries in particular are Chiefly menaced with these severe Judgments; it being conspicuous to all men, that they have already in part, seized upon France; and that the Shafts of Vengeance that are yet to be discharged, are from all parts level'd against that Tyranical Monarchy: Yet we may consider, that the place of the Triple Conjunction (so oft above named) happened in Square to the Horoscope of the French King, which cannot be looked upon otherwise than as a Prodrom of his approaching Ruin under the Influence of the same, especially considering the high Post wherein he is placed, and how fatal the Conjunction hath already been to those of the same Rank, which it hath reached: as may be instanced in his Allies, both Neighbouring and Remote; whose dismal Fates he may shortly expect to follow: for the Heavens will not be brib'd by all the *Luideor's* and Interest in the World, and tho' the main Storm be somewhat long a gathering, yet when it breaks, 'twill pour upon him like an Inundation: and for this, the present Year bids very fair, in the foregoing Revolution whereof, the Moon (which ever signifies the Multitude) is oppos'd to Mars, (the Lord of the Ascendent in his Geniture) which will make his Subjects Raging Mad; tho' I confess that Position threatens them also with the highest of Miseries and Calamities, such as usually Lacquey on the Wheels of War. But dangerous Distempers (especially of Potent Kingdoms) must unavoidably have dangerous Cures, if any.

The Sign or Ascendent of Paris, (♈ being that wherein the Moon meets with her Affliction from Mars and Venus, (who rule the Sixth and Eighth Houses) and wherein also the two Superiors cast their hateful Square, and that as well at the celebrating their threefold Opposition, as at the Vernal Ingress, denotes a multitude of Evils to befall that City in particular, amongst others subject to the same Sign. *Inferat morbos aestuantes, edificiorum*

# OBSERVATIONS, 1693.

 threatens the Ruin of many Foundations and Buildings, Fires,  
 fine Broils, Rabbles and Tumults amongst the Vulgar and  
 hence a thousand Mischiefs, Imprisonments and sudden Deaths!  
 and indeed, a Sickly as well as Troublesome Summer, may be  
 feared in many other parts of Europe. But we may reasonably  
 hope, that (in matters Politique) we in England enjoy a *Civil*  
*PEACE*, (notwithstanding the many late Conspiracies)  
 which God of his infinite mercy continue, together with the  
 long Lives and happy Reign of King William and Queen Mary.  
 Lastly, *That as I am an Astrological Professor, so I undertake*  
*to reach its several Parts; to wit,*

I. The *Pars Horaria*, the Method of Resolving Questions:  
 of Life, whether long or short? Rich or Poor? What Part  
 of the Life is like to be most Prosperous? Or any other Le-  
 gal demand, whose Solution is contain'd within the Perimeter  
 of this sublime Physical Science.

II. The *Pars Genethliaca*, the manner of Rectifying, Dis-  
 cussing and passing Judgement on *Nativities*, discovering the  
 most Remarkable Accidents that may happen during the Race  
 of Mans Life. Also how to Calculate the Longitude, Lati-  
 tude, Declination and Ascension of the Planets.

III. The *Pars Mundana*, how to Calculate and Judge an  
 Annual Revolution, Compose Monthly Observations, the Calculati-  
 on of Eclipses, past or to come, and to declare their Significa-  
 tion; together with the Portents of Comets, or Eminent Con-  
 jugations, the Rising, Southing and Setting of the Moon, or any  
 of the *Wandering Stars*, as also the Use of the Globes.

IV. In *Physick*: I am now sufficiently stored with all sorts  
 of Choice and well-prepared Medicaments, and have also (by  
 my own hand, through 12 Years Experience) fitted them for  
 the Cure of most Diseases Creable incident to the Bodies of  
 Men, Women and Children, of what Name or Nature soever;  
 which are published for the Advantage of all People, as well  
 in the Country as City.

I. My *Cordial Pills*, are known to be as excellent a Medi-  
 cine as any yet Published, to assist and fortifie decaying Na-  
 ture; for no destructive Matter can lurk in the Body of Man,  
 but these Pills will soon drive it out, and in its place render  
 the

the Body Healthful, having been effectual in Curing the *Dry-  
sie, Gripping in the Guts, extream Pains of the Gout, Green-sickness,  
bad Digestion, all manner of Surfeits, Exulceration of the Kidneys,  
Head-aches, Convulsion-fits, Fevers, Leprosie, difficulty of Breathing,  
Stoppage of the Stomach, Pain in the Stomach, Agues, &c.* and for  
the *SCURVY*, they are the best *Pills* in the World. They  
resist all foulness and Infection in the Act of Generation, Mun-  
difie and Cleanse both *Blood* and *Skin*, restore and increase  
Beauty, make Old Age comely, and the Complexions of all  
Persons Chearful and Sanguine, scarce a Malady from Head to  
Foot, but these *Pills* (with God's permission) will be found  
very assisting. Besides, the *Pills* will not Corrupt (if you  
keep them from Moisture) though kept an Hundred Years,  
and that no Drug-Medicine will do: wherefore they are ser-  
viceable for those that Sail to the *East* or *West-Indies*, for some  
that go such long Voyages, miserably perish for want of so  
Universal a Helper. These *Pills* are the Cheapest considering
